

Bump Rate CDs

Bump CDs let you bump your rate if rates go up after you open a CD. Just say "bump it up," and we'll raise your APY to our prevailing rate.

If the rate posted below is higher than your current rate on the same CD type and you have an available bump option, you may choose to bump your rate to the higher rate.

These rates are available for bumps on existing bump-rate CDs. For information on opening a new bump-rate CD and current rates on available products, please contact your local financial center.

Term	Rate	APY
14-Month Special**	1.29%	1.30%
OptionsPlus CD ⁺	1.34%	1.35%
36-Month Bump Rate CD ⁺⁺	1.99%	2.00%

**14-month 1-time bump rate will match the current rate on a regular 12-month CD.

⁺ One bump per 12-month term; rate will match current OptionsPlus rate.

⁺⁺ Bump available once every 12-months to the current 36-month rate.

APY is annual percentage yield, effective 8/30/10. Minimum balance and minimum to open each of the above CDs is \$1,000. Penalty for early withdrawal.
